

AWP AZ FAASTeam presents:

## **Aircraft Icing - In-flight and Ground**

Many accidents have been caused by the accumulation of ice and the resulting loss of aircraft performance. These have been a result of both in-flight and ground ice encounters. This seminar will focus on proper preflight planning to avoid icing conditions, and appropriate aeronautical decision making related to both ground and in-flight ice accumulation. We will also review the applicable parts of the Aeronautical Information Manual (AIM) related to icing. A few accident records will also be analyzed to assess how past accidents may have been prevented. The event will last approximately 2 hours.
